ARAGON ACQUIRES PALAMOUNTAINS, MYBEAU & INTRODUCES NEW EQUINE PRE-BOOST

Charlotte, NC (August 15, 2008) – Aragon Nutraceuticals Ltd. Is proud to announce exclusive distribution of the palaMOUNTAINS range of equine supplements. In addition to palaMOUNTAINS Equine and MyBeau PRO, Aragon has added Equine Pre-Boost to the palaMOUNTAINS line of All-In-One supplements.

The new palaMOUNTAINS Equine Pre-Boost is a unique blend of electrolytes and creatine combined with the original palaMOUNTAINS formula of vitamins and minerals, in an Omega-3 fatty acid oil base. The liquid formula protects the ingredients from oxidation and ensures a high absorption rate up to 99.5%.

palaMOUNTAINS Equine Pre-Boost is ideal for event preparation and recovery, hot temperatures, tying up and times of stress. Aragon recommends administering 40mL, 8-12 hours before the event, to provide antioxidants and a fast-acting energy boost for ultimate performance. In addition, 40mL is given following the event to replace nutrients and electrolytes horses lose during competition and to speed up the recovery process.

The convenient oral administration is enjoyed by horses, instead of traditional vitamin shots and tubing of electrolytes. palaMOUNTAINS Equine Pre-Boost comes in an 80mL syringe for individual horses or a 750mL multi-dose bottle.

Leading trainers, consigners, breeders and veterinarians use the palaMOUNTAINS range of products, producing multiple Grade 1 winners and sale-toppers. The products are available from tack shops and veterinarians. For more information, call Aragon Nutraceuticals, Ltd, at 877-788-5590.
